DETAILED ACTION

Allowable Subject Matter

1. **Claims 1-20**, are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding **claims 1, 14**, the present application teaches a method and system for determining a location of a user equipment using RTT measurements from a connected node B and RTT measurement of other node Bs which are not connected to the user equipment. The radio network controller of a network measures RTT of a connected node Bs and then measures RTT of non connected node Bs. Based on the RTT measurement, the distances of the user equipment from each node B is determined. Circles having radii equal to the distances of the user equipment from the nodes are used to determine the user equipment location as specifically mentioned on claims 1, 14.

The closest prior art to the present application such as Keranen et al. (US Patent 6,681,099) teaches a method and systems are employed by a wireless location system (WLS) for locating a wireless device operating in a geographic area served by a wireless communications system. A method includes monitoring a set of signaling links of the wireless communications system, and detecting at least one predefined signaling transaction occurring on at least one of the predefined signaling links. Then, in

response to the detection of the at least one predefined network transaction, at least one predefined location service is triggered. Keranen (6,681,099) does not address steps to be taken if there is no transceiver is active communication with UE. Keranen fails to teach *"determining if the user equipment is in active communication with a connected transceiver node in response to the request for locating a user equipment, requesting a connection between the use equipment and a selected transceiver node if the user equipment is not in active communication with any transceiver node"* as specifically mentioned on claims 1, 14.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
